

MIT ACADEMY OF ENGINEERING
DEPARTMENT OF COMPUTER ENGINEERING
SOFTWARE ENGINEERING HACKATHON

CLASS: TY B. TECH AY: 2025-26

DAY 1: ASSESSMENT RUBRICS [ESE- 60 MARKS]

DAY & DATE: FRIDAY, 22 MAY 2026

Criteria	Excellent (10-9)	Good (8-7)	Satisfactory (6-5)	Needs Improvement (4-0)
Identification & Justification of Process Model (10)	Clearly identifies and justifies the selection of process model with strong reasoning and relevance.	Identifies process model with justification, though may lack depth or thorough analysis.	Identifies process model but justification is vague or lacks sufficient support.	Does not identify process model or justification is missing/inaccurate.
Software Requirement Specification (10)	Comprehensive, well-structured, and clearly defined requirements meeting industry standards.	Requirements are mostly clear and structured but may have minor gaps.	Requirements are defined but lack clarity or completeness.	Requirements are missing or poorly structured.
UML Diagrams (10)	Well-designed UML diagrams with accurate representation and adherence to modelling standards.	UML diagrams are correct but may have minor issues in clarity or accuracy.	UML diagrams lack consistency or contain errors.	UML diagrams are missing or incorrect.
Design Modelling (10)	High-quality design model demonstrating clarity, structure, and adherence to best practices.	Design model is structured but has minor inconsistencies or areas for improvement.	Design model is present but lacks refinement or completeness.	Design model is missing or lacks coherence.
COCOMO Model Estimation (10)	Accurate and detailed estimation with proper calculations and justification.	Estimation is mostly accurate but may have minor errors or lack clarity.	Estimation is present but lacks justification or accuracy.	Estimation is missing or incorrect.
Test Scenarios and Cases (10)	Comprehensive test scenarios and cases covering all possible conditions effectively.	Test cases cover most conditions but may lack thoroughness in edge cases.	Test cases are defined but lack completeness or clarity.	Test cases are missing or inadequate.

DAY 2: ASSESSMENT RUBRICS [PR- 50 MARKS]
DAY & DATE: SATURDAY, 23 MAY 2026

Criteria	Excellent (10-9)	Good (8-7)	Satisfactory (6-5)	Needs Improvement (4-0)
Coverage of Project Objectives (10)	Clearly defines and covers all project objectives with strong justification and alignment to goals.	Covers most project objectives with reasonable detail, though minor gaps exist.	Covers project objectives but lacks clarity or completeness.	Objectives are vague, incomplete, or missing entirely.
Coverage of Project Modules (15)	All project modules are well-defined, integrated, and appropriately detailed.	Most project modules are covered, though some may lack clarity or integration.	Project modules are present but lack structure or completeness.	Project modules are insufficiently covered or missing.
Testing (15)	Comprehensive testing strategy covering all essential cases, including edge scenarios.	Testing is well-defined but lacks coverage of edge cases or minor aspects.	Testing is included but lacks thoroughness or critical details.	Testing is incomplete or absent, failing to validate functionality.
Tools Used (10)	Effective and appropriate use of tools with clear justification and application to the project.	Tools are relevant and mostly well-used, though justification may be limited.	Tools are included but lack proper application or explanation.	Tools are either absent or misused with minimal relevance to the project.
